You can perform **two-way messaging** with your drivers.

You can **remotely download data from your digital tachograph** on your vehicles and drivers.

You can get news **for your next by following** the maintenance, service and repair activities of your vehicles.

## Vehicle Tracking and Fleet Management System

## • SOLUTIONS

(FLEET MANAGEMENT, CANBUS, TAVI, LIVE DRIVING)

### Fleet Management System

Fleet management system ensures maintenance of vehicles, traffic fines and all other expenses; It also reminds the periodic operations that need to be renewed in certain periods such as inspection, insurance, comprehensive insurance. You can access your fleet from all computers, tablets and smartphones connected to the internet.

- Reduce your fuel costs
- Improve your operational and labor productivity
- Save time
- Track your fleet on mobile and web everywhere
- Get various reports through reporting systems

### • CANbus

Seyir Mobil offers a full range of compatible vehicles such as speed, odometer, fuel consumption, tank level, engine run time, engine speed and all the details on all compatible brands and models. With this information, your fleet management will be more comprehensive but you will be able to control your fuel costs and analyze the performance data of your drivers.

- Vehicle Speed, Engine Speed
- Average and Total Fuel Consumption
- Engine Temperature, Fuel Level
- Axle Weight, Engine Clock
- Total mileage, Service distance
- Engine Torque

**Digital Tachograph Data downloading system is solved in 2 different ways under Navigation Seyir Mobil.**

### LEGAL OBLIGATION

Digital Tachograph Data Download is a system for downloading, storing and storing data on buses that have more than 3.5 tonnes of all commercial vehicles and more than 9 seats (including drivers). This system; The European Commission (AETR) on the Work of Personnel Working on Vehicles Carrying International Road Transport and the Ministry of Transport, Maritime Affairs and Communications, are published in accordance with the Road Transport Directorate.

### • TAVI LOCAL

With Tavi Local, you can download digital tachograph data from your vehicles by physically interfering with the vehicle. By downloading this data download option, you can download the Tavi device to your vehicle's compatible digital tachographs and download the data, store it in the device and then transfer it to the computer.

## • TAVI REMOTE

Tavi Remote is a data download solution that works simultaneously with the vehicle tracking system. With this solution, the data downloading planning is based on Navigation Mobile, you will be able to access your digital tachograph data even if your vehicles are on the move or abroad. You can increase the efficiency of your fleet with Tavi Remote, which enables you to realize your management plans faster.

PROTECTION BLOCK

SMART  
CARD READER

## Emergency Button

This equipment placed inside the vehicle allows drivers to send an alarm to authorized persons by pressing the button when an emergency situation occurs.

## Driver Recognition Unit

It enables tracking of which vehicle was used by which driver, when and for how long, with the ID cards given to the drivers.

## Door Sensor

Door Sensor is installed on vehicle doors and provides information about where and when the doors are opened and closed to be sent to the system.

## Fuel Tank Protection Block

Fuel Tank Protection Block prevents possible fuel theft by providing definitive protection against fuel theft in companies' vehicles.

## Engine Blocking

It prevents the vehicle from starting by locking its ignition with a single command to prevent undesirable situations or off-duty use.

## Smart Card Reader

You can download the data generated by the tachograph remotely by inserting your company card into the Smart Card Reader.

## Temperature Sensor

With the temperature sensor, the temperature information in vehicles with hot-cold storage or refrigerated features is instantly measured and transferred to the system.

## Trailer Matching

"Which trailer is paired with which tractor?" or "Which trailers are available?" You can easily answer your questions such as BLE20.

## Navigation and Messaging

Garmin Navigation, which works integrated with the fleet management system, allows the route to be followed instantly by transferring the destination address from the navigation audio and video.
